

PRODUCT BULLETIN

ELDORADO AC-12 ACID CLEANER

ELDORADO AC-12 is a liquid, viscous acid cleaner for use on aluminum aircraft surfaces.

PROPERTIES

1. Viscous liquid for application to vertical surfaces and large structures.
2. Powerful cleaning action.
3. Removes oxides and corrosion products.
4. Prepare aluminum for painting and other surface treatments.
5. Nonflammable
6. Safe on Plexiglas™ and most plastics.
7. Approved by or conforms to: MIL-C-38334, Amendment I, AMS 1640, Douglas CSD #1, Chinese Aviation

USE

AC-12 can be used as full strength or diluted 1 to 1 with water. Preclean surfaces with **Eldorado ED-500** to remove heavy greases and oils. Prevent contact of *AC-12* with glass and high-strength steel by masking. Working from bottom to top to avoid streaking, apply *AC-12* and allow to remain in contact with the surface for 1 to 5 minutes. Aluminum will cause *AC-12* to form a white foam. When this foam starts to slide, agitate the surface and rinse with water.

PRECAUTIONS

Avoid skin contact by wearing rubber clothing and a face shield. In case of accidental contact, wash with soap and water. Avoid contact with eyes. If accidentally contacted with eyes, immediately flush eyes with plenty of water for at least 15 minutes. Call a physician. **Do Not** place *AC-12* in galvanized containers. **Always** use plastic.
