# **ELDORADO AC-12R**

## CORROSION REMOVER

**ELDORADO AC-12R** is a liquid, viscous acid cleaner and corrosion remover, for use on aluminum aircraft surfaces. **AC-12R** is particularly effective for removal of plastic blast residues.

### PROPERTIES

1. Viscous liquid for application to vertical surfaces and large structures.
2. Powerful cleaning action.
3. Removes oxides and corrosion products.
4. Etches glass.
5. Biodegradable.
6. Nonflammable.
7. Safe on Plexiglass™ and most plastics.

### USE

Preclean surfaces with **Eldorado ED-500** to remove heavy greases and oils. Prevent contact of **AC-12R** with glass and high strength steel by masking. Working from bottom to top to avoid streaking, apply **AC-12R** and allow to remain in contact with the surface for one to five minutes. Aluminum will cause **AC-12R** to form a white foam. When this foam starts to slide, agitate the surface and rinse with water.

### PRECAUTIONS

Avoid skin contact by wearing rubber clothing and a face shield. In case of accidental contact, wash with soap and water. Avoid contact with eyes. If accidentally contacted with eyes, immediately flush eyes with plenty of water for at least 15 minutes. Call a physician. Do not place **AC-12R** in galvanized containers. ALWAYS use plastic.
