

PRODUCT BULLETIN

ELDORADO AC-5 CORROSION REMOVER

ELDORADO AC-5 is a liquid, viscous, acid cleaner and corrosion remover, for use on aluminum and stainless steel surfaces.

PROPERTIES

1. Viscous liquid for application to vertical surfaces and large structures.
2. Powerful cleaning action.
3. Removes oxides and corrosion products.
4. Biodegradable
5. Nonflammable
6. Safe on Plexiglas™ and most plastics.
7. Approved by or conforms to: AMS 1626B, Boeing D-6, Douglas CSD #1, Airbus

USE

Preclean surfaces with *Eldorado ED-500* to remove heavy greases and oils. Prevent contact of *AC-5* with glass and high-strength steel by masking. Apply *AC-5* with a brush or with stainless steel equipment. Always start at the bottom and work upwards to avoid streaking. Allow to remain in contact with the surface for 1 to 5 minutes. Aluminum will cause *AC-5* to form a white foam. When this foam starts to slide, agitate the surface and rinse with water.

Aluminum alloys with a high copper content will turn dark after application of *AC-5*. This dark film can be removed by agitation with a brush while rinsing *AC-5* from the surface, or by application of *Eldorado D-2* solution immediately after rinsing *AC-5* from the surface.

Surfaces which require painting must be flushed with an alkaline cleaner, rinsed, and allowed to dry before paint application.

PRECAUTIONS

Avoid skin contact by wearing rubber clothing and a face shield. In case of accidental contact, wash with soap and water. Seek medical attention if eyes are exposed. ***Do Not*** place *AC-5* in *galvanized containers*. ***Always*** use plastic.
