ELDORADO CT-2500 DIPHASE CARBON REMOVER

ELDORADO CT-2500 is a tank-type, two-phase, solvent-based cleaner, paint stripper, and carbon remover.

PROPERTIES

1. Powerful paint stripper and carbon remover for engine parts.
2. Requires no heat.
3. Inhibited water seal which floats on the surface to prevent loss of solvent.
4. Safe on all metals, including magnesium and high-strength steel.
5. Nonflammable.
6. Detergents are biodegradable.
7. Approved by or conforms to: MIL-R-83936 Type I and 2,

USE

Eldorado CT-2500 is used as received, in a mild, steel tank at room temperature. **CT-2500** contains two layers as packaged in the drum; the top layer forming a liquid seal to prevent evaporation of active solvents in the carbon and paint-removing layer below. If a portion of a drum is used, agitate contents thoroughly before pouring and allow mixture to separate before use.

Immerse parts completely in lower layer and allow to remain for 30 minutes or more, as required for paint removal. Do not allow immersed parts to extend into the water seal layer. Rinse with low volume pressure spray or steam.

Avoid heavy contamination of oils and greases to increase the tank life. Precleaning of parts with an alkaline cleaner may prove economical in high-production situations.

Maintain upper layer at depth of 2 inches per foot of depth of lower layer, by additions of water. Seal ratios may be determined through the use of a glass sight tube.

PRECAUTIONS

Since **CT-2500** contains chlorinated solvents and cresylates, proper precautions should be taken to prevent contact with skin, eyes, or clothing. Use with adequate ventilation. Consult MSDS for further details.
