ELDORADO CT-2600

NON-PHENOLIC CARBON REMOVER

Eldorado CT-2600 is a diphasic solvent that cleans, strips and removes carbon at ambient temperatures.

PROPERTIES

1. Contains methylene chloride
2. Contains no phenols, chromates, or heavy metals
3. Used at ambient temperature to reduce energy costs
4. Safe on all metals
5. Non flammable.
6. Readily removes difficult paints systems, such as epoxies and stoving enamels.
7. Approved by or conforms to: Bell Helicopter

USE

Use *CT-2600* as received in a mild steel tank at room temperature. The material exists as a diphasic solution, with the upper layer being a seal to prevent evaporation of the active material. If using a portion of the drum, the contents must be thoroughly agitated before pouring into the tank to avoid segregating the contents. Avoid allowing the part being cleaned or stripped to extend beyond the active layer. Maintain upper seal at 2" per foot of lower layer by water addition.

Immerse completely in lower layer and allow to remain in solution for sufficient time to remove paint or carbon. Gently rinse with a low volume spray of water, or immerse part in an overflowing water rinse tank.

PRECAUTIONS

Avoid direct exposure to the product. If *CT-2600* accidentally contacts the skin, flood the affected area with water. If further treatment is required seek medical attention. In case of contact with eyes, flush thoroughly with water and seek medical attention.

CT-2600 must be used with adequate ventilation, due to the high-chlorinated solvent content. Avoid storing material in high heat environments
