

## PRODUCT BULLETIN

---

### **ELDORADO ED-347** Nonferrous Metal Cleaner/Inhibitor

**Eldorado ED-347** nonferrous metal cleaner and corrosion inhibitor was designed for use on copper, brass and aluminum surfaces that are attacked by harsh alkaline cleaners. It is formulated to remove tough organic and inorganic soils, while leaving an acceptable finish on nonferrous metals.

**Eldorado ED-347** combines a unique mixture of corrosion inhibitors and surfactants to clean the most stubborn oils, greases, and smut from metal surfaces. It accomplishes this and still leaves a bright protective film on nonferrous metals.

#### **PROPERTIES**

1. Nonferrous metal cleaner
2. Excellent rinsing properties
3. Effective corrosion inhibition for many types of nonferrous metals

#### **USE**

Use in spray wash applications where a wide variety of tough soils must be removed from nonferrous surfaces. Dilute at a ratio of 3 to 7%, depending on the types of soil and the amount of inhibition required.

#### **PRECAUTIONS**

This product has alkaline components that may be harmful, if ingested. Eyes and skin should be protected by a face shield and rubber gloves. Read the MSDS for spill, discharge and other safety measures.
