

PRODUCT BULLETIN

ELDORADO ED-400 VISCOUS, ALKALINE CLEANER

ELDORADO ED-400 is a viscous, alkaline material that will do the job normally expected of acid cleaning materials. It is used for etching and brightening aluminum, for removing rust from steel, and for removing carbon, food residues, grease, and other stubborn soils from hard surfaces.

PROPERTIES

1. Removes grease, oil, carbon, and oxidation from metal surfaces.
2. Etches aluminum mildly.
3. Safe on Plexiglas™ and electrical wiring.
4. Safe on steel, magnesium, titanium, and copper.
5. Will not cause hydrogen embrittlement of high-strength steel.
6. Biodegradable.
7. Nonflammable.
8. No vapor toxicity.
9. Approved by or Conforms to: AMS 1626, Boeing D6, Douglas CSD #1, and USDA

USE

Spray undiluted ***ED-400*** onto the surface (precleaning is not necessary); allow to react for 5 to 30 minutes, at ambient temperatures; then rinse off with a stream of water. A smut which may form when used on bare aluminum surface may be easily removed while it is still wet by mopping the surface during rinsing.

PRECAUTIONS

Avoid contact with skin and eyes through the use of rubber gloves, protective clothing, and face shield. DO NOT TAKE INTERNALLY.

In case of accidental contact with skin, flush affected area with copious amounts of water and apply a soothing salve. For contact with eyes, flush immediately with large amounts of water and seek medical attention. If taken internally, give vinegar, lemon juice, orange juice, or vegetable oil.

Notice: The information presented here is based upon our laboratory tests and field use experience. Since conditions of actual use are beyond our control, any recommendations or suggestions are made without warranty, express or implied. **Eldorado Chemical Co., Inc.**'s sole obligation shall be to replace that portion of the product shown to be defective; nor shall we be liable for any loss, damage or injury—direct or consequential—arising out of the use of this product.
