---

### **ELDORADO PR-4008** PAINT REMOVER

**ELDORADO PR-4008** is a viscous, acid-activated, phenolic paint remover, particularly effective for removal of polyurethane and epoxy paints from aircraft surfaces.

#### PROPERTIES

1. Effective for removal of acrylic, alkyd, polyurethane, and epoxy paints.
2. Nonflammable
3. Contains phenol.
4. Safe for use on aluminum, mild steel, titanium, and cad plate.
5. Approved by or conforms to: MIL-R-81903A, Type II, Class 1, Boeing D6, Douglas CSD #1

#### USE

Spray or brush **PR-4008** onto surface to be stripped. Allow 20 minutes to 1 hour for paint to be loosened. Agitate to break remaining bond, then rinse with stream of water.

Conditions of humidity and temperature will dictate dwell time. Clean stripped surface with a good cleaner to remove all stripper residues.

#### PRECAUTIONS

**Avoid contamination with water.** **PR-4008** may cause pitting of aluminum or magnesium when contaminated with water. **Do not use on magnesium or high-strength steel.** Adequate ventilation is required, due to presence of chlorinated solvents. Protective clothing, such as face shields, rubber gloves, and rubber aprons, should be provided. In case of accidental contact with skin, wash thoroughly with soap and water, and rinse with alcohol containing 2% camphor. For eyes, flush with copious amounts of water, then seek medical attention.
