### ***ELDORADO PT-162P*** POWDERED TOILET DEODORANT

***ELDORADO PT-162P*** is an intensely blue, heavy-duty, powdered toilet deodorant for use in aircraft, buses, RV's, and trains to control corrosion, bacteria, and odor. ***PT-162P*** is specifically designed for use where long-time intervals are required between changeovers of solution. The blue color may be used as a guide for controlling odors and objectionable color. ***PT-162P*** is buffered to reduce corrosion and contains no heavy metals or phenols. It's also safe on all materials commonly used in chemical and portable toilets and refuse handling equipment.

***PT-162P*** is available in a variety of convenient aircraft "Industry Standard" packaging, such as drums (with measuring scoop), sleeves and dissolvable packets. ***PT-162P*** is also available in multiple fragrances which helps overcome "Fragrance Fatigue" - the phenomenon that occurs when one smells the same fragrance for long periods of time.

#### PROPERTIES

1. Buffered alkalinity to reduce corrosion.
2. Nonflammable
3. Produces a long-lasting fragrance
4. Biodegradable
5. Contains no formaldehyde or quaternary ammonium compounds.
6. Approved by or conforms to: AMS 1476, Air Canada

#### USE

***ELDORADO PT-162P*** must be diluted for use. Add 1 sleeve (or 80 grams) per 50 gallons of water, or 1 pouch (8 grams) per 5 gallons, in the aircraft supply tank. Mix the solution well, and allow up to 10 minutes for the powder to dissolve. This will produce a dark-blue color and pleasant fragrance. If needed, on longer trips or during the summer, add additional ***PT-162P*** to maintain the blue color and mask odors.

#### PRECAUTIONS

Do not take internally. Avoid skin contact. Wash with soap and water in case of skin contact.
